

Podcast Starter Kit

Over time, many podcasters develop a rapport with their fans, and the fans feel like they know their favorite podcasters intimately. By improving your audio quality, you strengthen that bond and the overall enjoyment of listening to your podcast. The **Podcast Starter Kit** gives you a versatile and quick improvement to your room, so you get the most out of your microphone, your voice and your time with listeners.

- The flagship version is designed primarily for a single user in need of a moderate acoustic treatment in a small space — one **DeskMAX™ Home Office** is included.
- For podcasters looking for additional absorption, the **Podcast Starter Kit Plus** includes two **DeskMAX™ Home Office Panels**.

Podcast Starter Kit

The **Podcast Starter Kit** is designed to control your audio in your room, while providing portable absorption to work within your setup restraints. By focusing on the immediate surrounding area of your setup, your podcast recordings will become more personal and more professional. The **DeskMAX Home Office** reduces microphone bleed in multiple mic setups and enhances your recording space's aesthetic with your choice of three colors.

BENEFITS

- Reduces reverberation and echoes
- Improves speech clarity
- Includes portable and versatile **DeskMAX™ Home Office** panel(s)

DIMENSIONS

- **Podcast Starter Kit Box:** 24" x 24" x 8.5"
Podcast Starter Kit Plus Box: 24" x 24" x 12"
- Both **Podcast Starter Kits** cover 16 sq. ft. + **DeskMAX™ Home Office** panel(s)
- **Studiofoam® Wedgies™:** 12" x 12" x 2"
- **DeskMAX™ Home Office** panel: 18" x 18" x 3"

INCLUDES

- (16) **Studiofoam® Wedgies™** (charcoal)
- **Podcast Starter Kit:** (1) **DeskMAX™ Home Office** (charcoal/purple/burgundy)
- **Podcast Starter Kit:** (2) **DeskMAX™ Home Office** (charcoal/purple/burgundy)
- (32) **EZ-Stick Pro™** Tabs

INSTALLATION

- **EZ-Stick Pro™** Tabs require a clean, flat surface for installation
- Pressure must be applied per the **EZ-Stick Pro™** Tabs guide
- **EZ-Stick Pro™** Tabs are a permanent installation and will damage the wall when removed

Podcast Starter Kit Studiofoam® Absorption

When a word is spoken inside a room, the sound spreads throughout the room, hits hard surfaces and bounces off in various directions. These reflections cause reverberation and significantly impact the quality of audio recordings. By adding absorption from your studio starter kit, particularly in areas of direct reflection (where your mouth or speakers are pointing), reverberation is decreased and recording fidelity is improved. see figure 1.

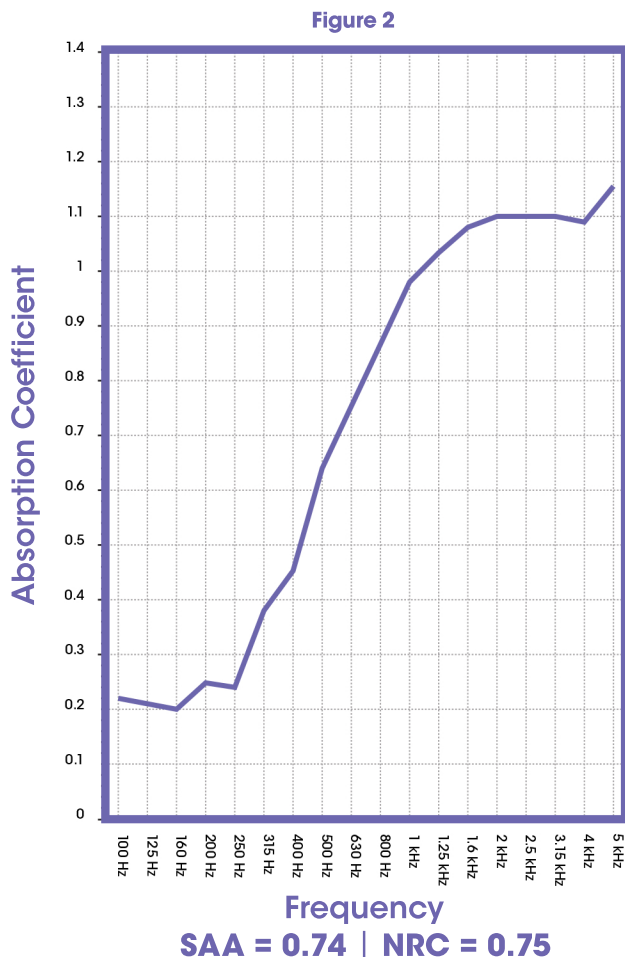

How well a product absorbs sound is based on many conditions, such as the type of material, its thickness and shape. The properties of absorption also change based on frequency. High frequencies are more easily absorbed than low frequencies. These are measured at 1/3rd octaves and their performance is called its absorption coefficient.

The average absorption is calculated in NRC (Noise Reduction Coefficients). At 100% NRC, all sound is absorbed. Zero NRC means no sound was absorbed.

The Studiofoam® Wedgie™ Absorption panels, included in the Auralex Streamer Starter Kit, provide an NRC of 0.75, meaning 75% of sounds that hit the panels are absorbed. This is a perfect NRC for recording vlogs, podcasts, and general streaming. see figure 2.

DeskMax Home Office™ Portable Desktop Absorber

Improve the clarity of your audio for podcasting, video conferencing, remote meetings and many more professional applications.

- Adaptable for office, home and additional work surfaces
- Clarifies your spoken word and everything you listen to
- 3 attractive color options to complement your space's aesthetic
- Effective, trustworthy performance

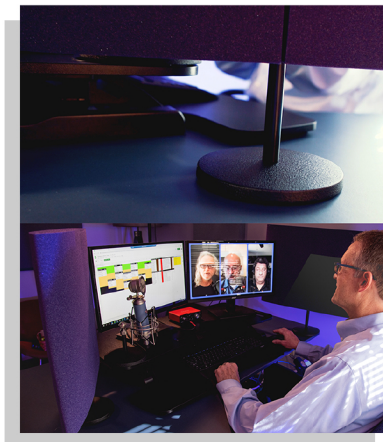

Podcast Starter Kit

DeskMax Home Office™ Portable Desktop Absorber

Your Sound. Up Front.

Win the sound-quality battle on conference calls, meetings and presentations with the Auralex® DeskMAX™ Home Office. Make your delivery and listening experiences next-level with a powerful, yet compact, companion that fits seamlessly into your workspace. Put yourself at the center of the conversation with the Auralex® DeskMAX™ Home Office.

Your Sound. Your Space.

Using the industry's gold standard, Auralex® Studiofoam®, the DeskMAX™ Home Office is professionally engineered to absorb reflected voice energy and improve your voice's richness to your microphone. The DeskMAX™ Home Office reduces room noise, reverb and echo to help you hear others better. The low-profile design and sturdy base offer adaptable desk positioning.

Your Sound. Delivered Better.

Simply put, the Auralex® DeskMAX™ Home Office clarifies everything your mic picks up and everything your speakers put out. Your communication will be quicker and easier, and you'll come across as more professional on your podcasts, recordings, voice calls and virtual meetings. Inspired by Auralex®'s industry-leading studio treatments, the DeskMAX™ Home Office will refine your nearfield audio and transform your presentations. You'll hear — and be heard — loud and clear.
