

ProBanner™

SOUND ISOLATION BANNER

ProBanners are made-to-order, custom absorbers that provide an economical method of treating acoustical problems in large spaces. Great for reducing reverberation and reflections in gymnasiums, arenas, pools, sanctuaries, restaurants, nightclubs, and lobbies. These absorption panels are typically hung horizontally across the ceiling but can also be used for wall applications.

ProBanners are available in vinyl, nylon and fabric coverings in a variety of colors and hold up in harsh environments with easy installation using the supplied hardware.

Painted metal washers are supplied with the ProBanners for installation. They are Class A fire rating per the ASTM E84 test protocol, so they're perfect for commercial facilities.

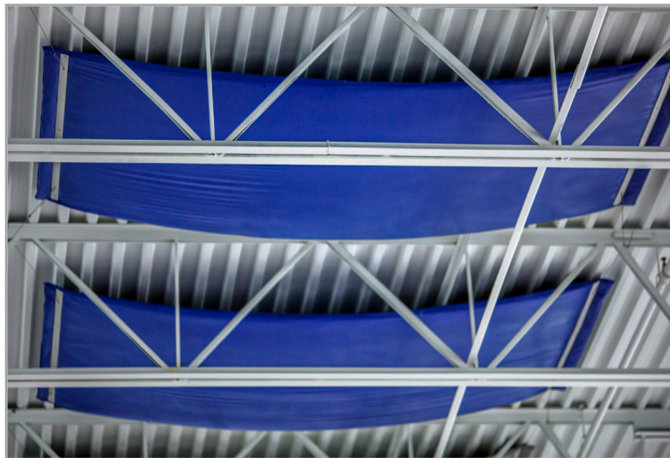

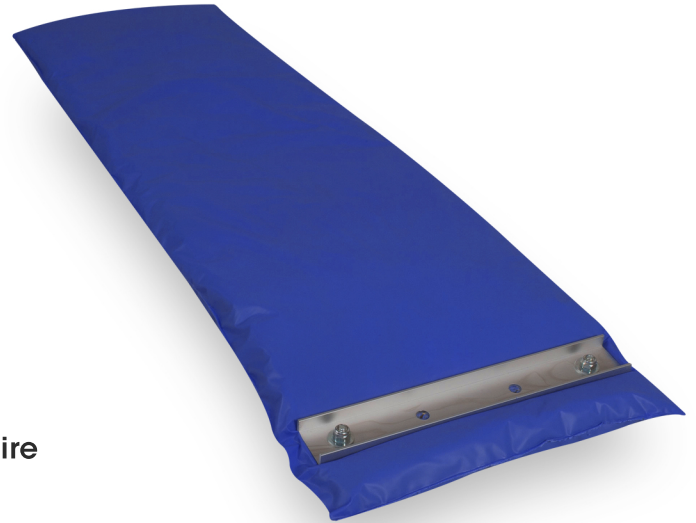

ProBanner™

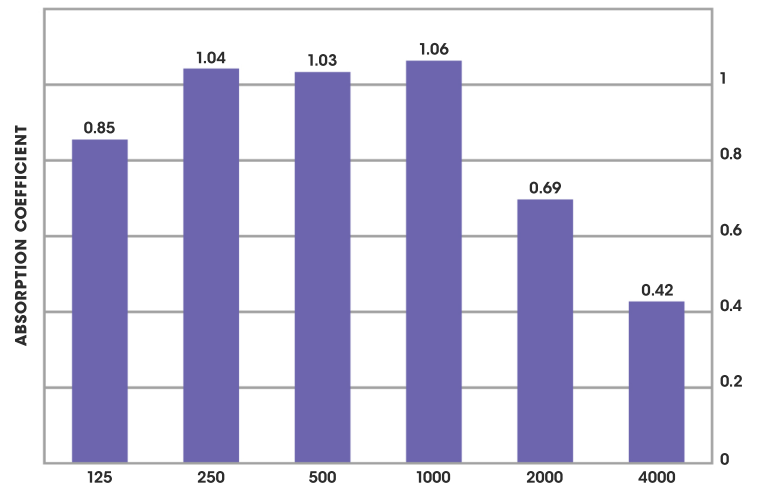

SOUND ISOLATION BANNER
