FABRIC-WRAPPED WOOD FRAME ABSORBERS

AuraPanel Wall Panels

Auralex Acoustics AuraPanel Wall Panels are designed to reduce unwanted reflections and absorb low to high-frequency sounds, creating a balanced and controlled acoustic environment. Perfect for recording studios, home theaters, and podcast studios, these panels provide exceptional sound clarity while seamlessly blending into your décor with their assortment of color and fabric options.

AuraPanel Ceiling Panels

AuraPanel Ceiling Panels offer superior acoustic absorption, targeting overhead reflections and excessive reverberation that can compromise sound quality. Ideal for open office layouts, conference rooms, and performance spaces, these panels provide an unobtrusive yet highly effective solution to enhance sound clarity without sacrificing style.

The Auralex AuraPanel Ceiling Mounting Kit

includes four stainless steel tethers, four Phillips head screws, and four washers that attach to the AuraPanel's pre-installed threaded inserts for secure ceiling cloud installation. By absorbing unwanted ceiling reflections, it improves clarity, stereo imaging, and mix accuracy for a more controlled listening environment.

AuraPanel Corner Panels

AuraPanel Corner Panels, also known as bass traps, are specifically engineered to address low-frequency sound buildup in corners, ensuring a more accurate bass response. Essential for recording and mixing studios, as well as home theaters, these panels help create a well-rounded acoustic environment while maintaining a sleek and professional appearance.

Endless Creative Possibilities

AuraPanel allows you to create an acoustically optimized space that also complements your aesthetic preferences. With customizable layouts and a wide-range of colorways, the AuraPanel can be tailored to suit any environment. Its versatility makes it ideal for various spaces, including recording studios, home theaters, offices and more. Whether enhancing sound quality for professional audio production or improving speech clarity in commercial and educational settings, the AuraPanel is a stylish and effective acoustic solution.
