

Studiofoam® Wave™

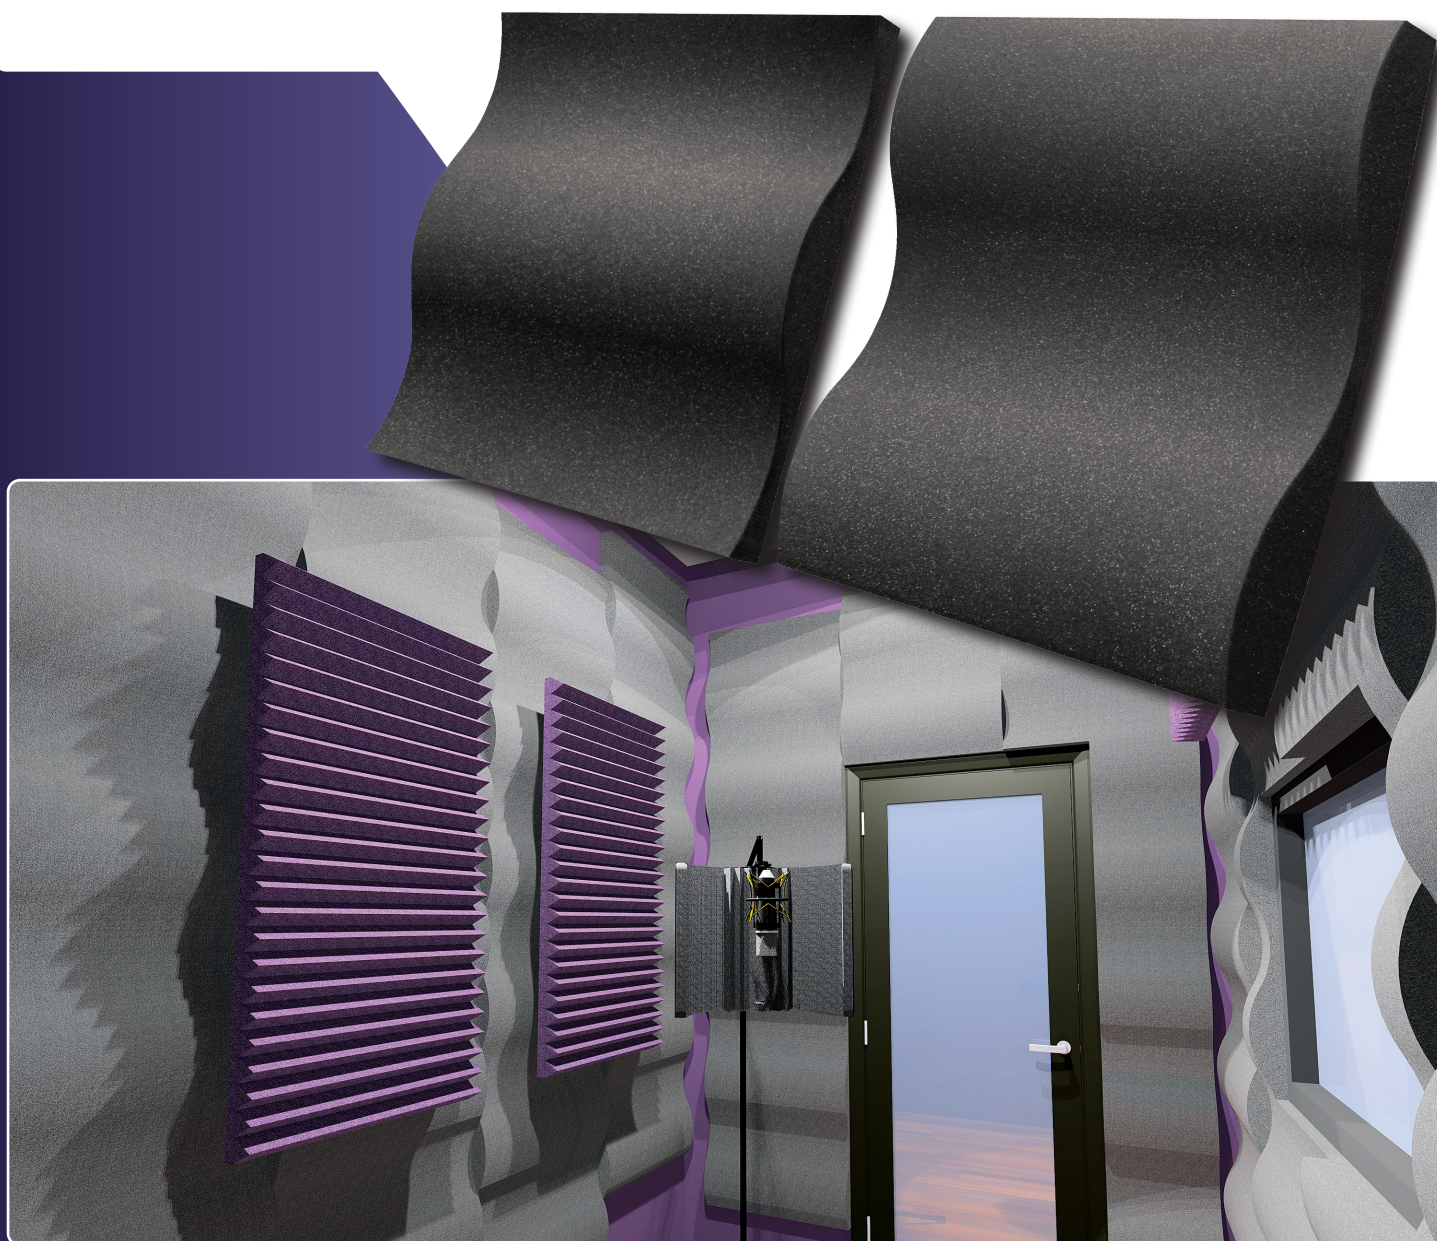

Auralex's new **Studiofoam® Wave™** is 2'x2' and features a dynamic wave pattern that rises from 1" to 3" thickness.

Studiofoam® Wave™ can help control unwanted mid- or high-frequency reflections and standing waves in a variety of professional and residential applications.

FEATURES:

- 2' wide x 2' long; dynamic 1" to 3" thickness
- Available in Charcoal Gray
- Melamine-free formula won't crumble with age
- Innovative, upscale pattern looks great!

622-112 Studiofoam Wave Spec Sheet (12/19/2019 - 10:12 AM)

Studiofoam® Wave™

Studiofoam® Wave™ panels help reduce excessive reverberation and flutter echo in small- to medium-sized spaces and offer a unique upscale appearance that looks and performs great. The unique undulating pattern of the **Studiofoam® Wave™** provides smoothly varying absorption across the frequency spectrum, thus also spreading sound in the time domain. It imparts a pleasing, natural sound that complements many environments.

Studiofoam® Wave™

- Unique new Wave profile offers numerous design possibilities
- Overall NRC of 0.80, so it performs very well
- Controls harsh high frequency reflections and flutter echoes. Lends a controlled sense of openness to your space.
- Appropriate for use in project studios, vocal booths, live rooms, listening rooms and home theaters.
- Add world-renowned LENRD Bass Traps for a complete broadband solution.
