

# Sustain™ Series Bamboo Sound Diffusors

- **Acoustically Engineered:**  
Diffusion properties designed to reveal the true purity of sound in your space
- **Simple Installation:**  
Wall, ceiling or drop grid mounting options (model dependent)
- **Environmentally Friendly:**  
Bamboo is sustainably grown and harvested

Sustain Prism™

Sustain Metro™

Sustain Lens™

Sustain QuadraTec™

Sustain Pyramid

## Sustain Prism™ (3" x 23.75" x 23.75")

The **Auralex Sustain Prism** eliminates flutter echoes and other acoustical anomalies without removing acoustical energy from the space. This design disperses sound evenly to create a more consistent listening or recording environment. Can be wall mounted or used in reinforced ceiling grids.

## Sustain Metro™ (2.61" x 23.25" x 23.25")

The **Auralex Sustain Metro** adds a contemporary aesthetic to your room while eliminating the negative effects of flutter echoes. The **Sustain Metro** evenly disperses acoustical energy throughout the listening environment without removing ambiance from the room. Intended for wall mounting only.

## Sustain Lens™ (3" x 23.75" x 23.75")

The **Auralex Sustain Lens** scatters and redirects acoustical energy and is an effective alternative to absorbing reflections. The **Sustain Lens** can be beneficial in numerous applications: Creating a "large sound" in a small room, optimizing absorption panels by redirecting energy so that they are more efficient or channelling acoustical energy into an adjacent space to enhance your listening or recording environment. Intended for use in ceiling grids only.

## Sustain QuadraTec™ (4.1" x 23.75" x 23.75")

The **Auralex Sustain QuadraTec** provides excellent scattering properties, resulting in a warm, musical character to the dispersed sound. **Sustain QuadraTec Diffusors** are a mirrored, nested pair, giving you two unique diffusion tools when used in combination with each other, or in larger arrays, can result in a more spacious feel in any room. Can be wall mounted or used in ceiling grids.

## Sustain Pyramid™ (6" x 23.75" x 23.75")

The **Sustain Pyramid** is optimized to provide high quality sound diffusion while also doubling as an effective bass trap when filled with absorptive material. The bamboo material offers a more musical experience when tested against comparable products made from hardened fiberglass or plastic. Can be wall mounted or used in ceiling grids.

While many **Auralex** products are fire retardant and/or self extinguishing to varying extents, we cannot guarantee that any product meets the specific building code regulations in your area as regulations widely vary from place to place.

Check with your local fire marshal or building inspector for approval prior to purchasing or installing any of our products. **Auralex** will not be held liable for property damage or injuries caused by the misuse of our products.
