

# Roominator Performance Series™

## USER GUIDE

### EACH KIT INCLUDES:

#### Project 2™

- (24) 2'x2'x2" Studiofoam® Wedge
- (8) LENRD® Bass Traps
- (144) EZ-Stick Pro™ Tabs

#### Deluxe Plus™

- (24) 2'x2'x2" Studiofoam® Wedge
- (8) LENRD® Bass Traps
- (6) T'Fusor™ Diffusors
- (168) EZ-Stick Pro™ Tabs

#### Pro Plus™

- (36) 2'x2'x2" Studiofoam® Wedge
- (12) LENRD® Bass Traps
- (8) T'Fusor™ Diffusors
- (248) EZ-Stick Pro™ Tabs

## INSTALLATION:

**Studiofoam Wedge, LENRD Bass Traps and T'Fusor Diffusors** can be mounted to standard drywall with the included **EZ-Stick Pro Tabs**. Be advised that the **EZ-Stick Pro Tabs** are designed for permanent installations and will damage drywall and painted surfaces when removed.

Mark the target position on your wall or ceiling where the product will be mounted using small pencil marks, pieces of masking tape or any similar non marring method. Be sure the surface where the **EZ-Stick Pro Tabs** will adhere is free of dirt, dust or other oily contaminants by spot cleaning with rubbing alcohol.

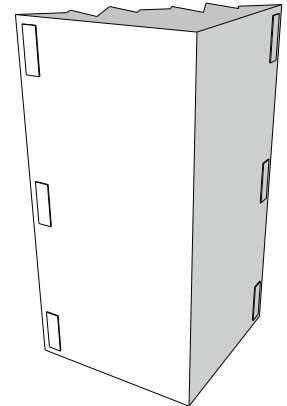

Each **Studiofoam Wedge** panel and **T'Fusor Diffusor** use 4 **EZ-Stick Pro Tabs**, each **LENRD Bass Trap** uses 6 tabs.

Remove one of the release layers on the **EZ-Stick Pro Tabs** and affix it to the rear side of the **Studiofoam Wedge** perimeter, usually near the corners. On **LENRDs**, place the tabs along the thin edge as shown below. For all **Studiofoam** products, apply very firm pressure for 30 seconds in order to ensure the **EZ-Stick Pro Tabs** properly adhere to the **Studiofoam**. *Not using adequate pressure will cause the EZ-Stick Pro Tabs to fail.*

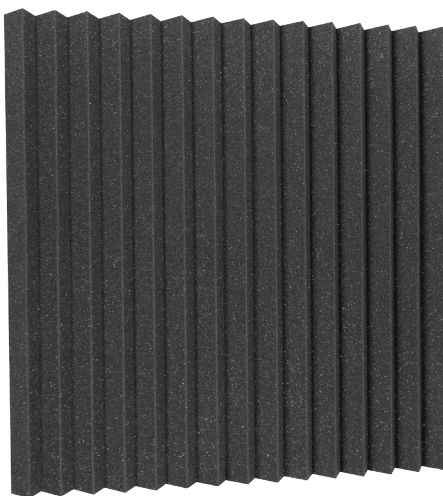

Remove the second layer of the release paper from each of the **EZ-Stick Pro Tabs**, carefully orient the panels position prior to contact with the wall, then press in place with firm pressure for 30 seconds.

## USER GUIDE

### GENERAL PLACEMENT SUGGESTIONS

#### STUDIOFOAM:

**Studiofoam Wedge** panels reduce mid-high frequency reflections, flutter echo, room ring and excessive reverberation. To maximize performance in a project studio or control room, consider placing the panels at the first reflection points located to the sides, front, rear and ceiling above your listening position. To maximize performance in a live room, consider spacing the panels evenly throughout the room and staggering treatment across parallel surfaces.

#### LENRD: Low End Noise Reduction Device

**LENRD Bass Traps** are designed for the 90 degree corners of a room. To increase performance, place them vertically between adjacent walls and horizontally between a wall and the ceiling.

#### T'FUSOR:

**T'Fusor Diffusors** scatters high frequency energy preventing them from grouping so that there are no hot spots or nulls in the room. In control rooms and project studios, **T'Fusor** diffusors are best placed in the rear of the room or above the mix position. In live rooms, space the panels evenly, inter-mixed with **Studiofoam Wedge** panels. Backfilling the **T'Fusors** with **Auralex Mineral Fiber Insulation** or **Auralex PlatSheet™ (Platfoam™)** will help increase absorption in the low end.

### SPECIFIC PLACEMENT SUGGESTIONS

**FREE**  
Personalized  
Room Analysis  
Form

#### FREE PERSONALIZED ROOM ANALYSIS:

For specific placement suggestions regarding your room, feel free to submit a free **Personalized Room Analysis** form online at: [www.Auralex.com/praf/](http://www.Auralex.com/praf/). You provide information about your room including a room diagram and photos. **Auralex** will diagram your room, including all surfaces with product placement indicated.

Room Analysis  
**PLUS**

#### ROOM ANALYSIS PLUS:

For a more in depth analysis of your room, we offer the **Room Analysis Plus** service. We supply the frequency sweeps, you send us the recordings of your room and we'll deliver more detailed suggestions based on our findings. Contact your **Authorized Auralex Dealer** for pricing.
